

Your B2B Portal. Enterprise-Ready. Fully Customisable.

PartnerBridge is a secure, Azure-based B2B portal platform built for enterprise-scale operations that demand compliance, flexibility, and integration. With built-in authentication, audit trails, and custom workflows, PartnerBridge empowers businesses to automate and digitise client-facing processes without the rigidity of traditional platforms.

WHO IT'S FOR

- Enterprises with regulated or complex workflows
- Organisations needing branded, multi-client portals
- Teams automating approvals, file exchanges, or onboarding

KEY CAPABILITIES

Azure AD Integration

Enterprise-grade authentication, SSO, and role-based access.

White-Label Interface

Adapt look, feel, and layout per brand, client, or division.

Audit & Compliance

Full user tracking, data retention controls, and exportable activity reports.

Custom Workflow Builder

Visual builder for bespoke workflows—fast deployment with full audit tracking.

Secure File Exchange

Uploads, validations, approvals and logs, all within one secure flow.

Flexible Integration

Seamless connectivity to ERP, CRM, APIs, and legacy systems.

WHY PARTNERBRIDGE?

Enterprise Security — Azure-hosted, encrypted, compliant

Customisation Without Code Debt — Modular, adaptable architecture

Global Delivery Partners — Visualize Systems (UK), Digital2DNA (US), Dreamsmiths (South Africa)

Rapid Deployment — Pre-built components and partner-led implementation

Get started

PartnerBridge is ready to scale with your business needs. Book a demo or connect with a regional partner.
